International Mobility Company established in France is searching for 15 talented and skilled Java Developer with experience in building high-performing, scalable, enterprise-grade applications. You will be responsible for Java/JEE application development while providing expertise in the full software development lifecycle, from concept and design to testing.

Key responsibilities:
  o Design and develop high-volume, low-latency applications for mission-critical systems, delivering high-availability and performance.
  o Contribute in all phases of the development lifecycle.
  o Write well designed, testable, efficient code.
  o Ensure designs are in compliance with specifications. o Prepare and produce releases of software components.
  o Support continuous improvement by investigating alternatives and technologies and presenting these for architectural review.

Requirements:

  ✓ **General requirements**:
    o EU28 Nationality
    o Residence in a EU28 country (outside France)
    o Over 35 years old
    o Registered on Reactivate/YfEj Platform with a complete CV in English

  ✓ **Language knowledge**:
       Good command of French and English language (at least B2)

✓ **Other specific requirements:**
- Master's degree in Computer Science, Engineering or a related subject
- At least 3 years of Java programming experience
- Proven hands-on Software Development experience
- Proven working experience in Java development
- Hands on experience in designing and developing applications using JEE platforms
- Object oriented analysis and design using common design patterns.
- Profound insight of Java and JEE internals (Class loading, Memory Management, Transaction management etc)
- Excellent knowledge of Relational Databases, SQL, Frameworks (Spring, Struts, Hibernate)
- Experience with test-driven development
